2001-2002	12	10	9	14	12	14	5

¹ Interest on delayed transfers from general funds is included.

² Government contributions include not only amounts to help cover program costs but adjustments to the assets to account for contingencies. Since the financing rates to determine both premium rates and government contributions are set prospectively, the financing may not be adequate to cover actual program expenditures. Consequently, trust fund assets contain contingency levels to cover the impact of a reasonable degree of variation between actual and projected expenditures. The government contributions include adjustments to maintain adequate contingency levels. Some of the adjustments increase the contingency levels when they have been depleted and in other cases decrease the levels when they are more than sufficient.

³ Total includes the catastrophic premiums due to the Medicare Catastrophic Coverage Act of 1988 (P.L. 100-360).

NOTES: Totals do not necessarily equal the sum of rounded components. For more detail on fund transactions, see "Annual Report of the Boards of Trustees of the Federal Hospital Insurance and Federal Supplementary Medical Insurance Trust Funds." Legislation mandates that from January 1984 through December 1990, and January 1996 and thereafter the monthly premium for aged enrollees be kept at a constant 25 percent of expected monthly cost, i.e., one half the actuarial rate.
